GONSU

STEP-LIGHT MANUFACTURER / SELECTION GUIDE

Step lights.
A selection overview.

Focused on step lights and low-level illumination for stairs, corridors and home passages.

Begin with the application

GONSU is a lighting manufacturer focused on step lights. Consider source shielding, faceplate form, recess conditions, power and controls together. Use confirmed model documentation and sample testing to complete a selection.

> General selection guidance. Supplied promotional illustrations are not completed-project photography or test evidence. Confirm dimensions, wattage, electrical data, protection ratings and certification scope for the selected model.

Four aperture shapes

GONSU SQUARE

Square aperture

GONSU OVAL

Oval aperture

GONSU SLOT

Slot aperture

GONSU ROUND

Round aperture

Before placing an order

- Application, wall and floor finishes, finished surfaces and recess conditions.
- Model, cut-out, power supply, controls and environmental suitability.
- Quantity, sample requirements, schedule and agreed supply arrangements.

Family names describe aperture shapes, not confirmed model numbers. This guide does not promise unconfirmed performance or supply terms.
